

To: Thomas Marinelli

From: Michael S. Demko, PE

Date: 7 May 2024

Subject: SRWRF – CO#7 Justification

In order to resolve several issues that arose during construction, Wade Trim recommends the following change orders to the construction contract. The recommendation is based on Wade Trim's adjustments to the contractor's proposals to account for concurrent delays.

PCO#	Title	Value
15	Plant Reuse Water Pump Revised Duty Rating	\$ 48,143.27
38	Odor Control Duct Revisions	\$ 134,496.82*
40	Force Main Piping Changes at Road Crossing	\$ 25,676.69*
41	Grit Channel and Equipment Modifications	\$ 101,472.89
42	CIP System Modifications	\$ 120,474.38*
43	Hose Station at PDLS	\$ 17,633.48*
44	Potable Water Piping Modifications	\$ 186,910.79*
46	Coatings	\$ 31,721.31
47	Hollowcore Support Angles	\$ 18,628.59
48	Sleeves Coupling for Piping Under 3MG Tank	\$ 26,978.19
49	MCB-1B	\$ 170,430.02
50	Fiber Optic Cable	30,973.68
Total		\$ 913,540.11*

PCO#15 – Plant Reuse Water Pump Revised Duty Rating [Increase of \$48,143.27]

Operating parameters for each piece of equipment were reviewed. As a result of flow optimization, the specification is being updated to capture the duty points of 380 gpm @ 91.2 psi and 100 gpm at 110 psi. Note that this Proposed Change Order (PCO) requires a \$12,630.00 additional cost to be paid to Kubota for equipment under direct purchase that is not included in this PCO amount.

PCO#38 – Odor Control Duct Revisions [Increase of \$134,496.82 & 0 days]

Operating parameters for each piece of equipment were reviewed. As a result of the review, odor control duct sizes and routing were revised. The contractor's PCO was for \$170,576.82 and 155 days which included \$37,788.00 for additional bonds, primarily due to the extra time.

PCO#40 – Force Main Piping Changes at Road Crossing [Increase of \$25,676.69 & 0 days]

Unforeseen existing conditions at the connection point to the existing force main required modifications to the piping at the connection point. The contractor's PCO was for \$26,586.69 & 2 days which included \$1,174.20 for additional bonds, primarily due to the extra time.

PCO#41 – Grit Channel and Equipment Modifications [Increase of \$101,472.89]

The equipment cost for the grit removal equipment escalated due to pandemic-induced inflation from the date of the original purchase order of December 2020 to the fabrication date of July 2022. In addition, the grit channel structure was redesigned to produce enhanced velocity entering the unit.

PCO#42 – CIP System Modifications [Increase of \$120,474.38 & 0 days]

The membrane clean-in-place (CIP) chemical system is being relocated from an interior location to a pad outside the building to reduce safety risks associated with handling and storing the chemicals. The contractor's PCO was for \$189,584.38 & 287 days which included \$71,006.26 for additional bonds, primarily due to the extra time.

PCO#43 – Hose Station at PDLs [Increase of \$17,633.48 & 0 days]

A wash-down water line is being provided at the Plant Drain Lift Station (PDLs) for ease of operator maintenance. The contractor's PCO was for \$77,543.48 & 255 days which included \$60,684.15 for additional bonds, primarily due to the extra time.

PCO#44 – Potable Water Piping Modifications [Increase of \$186,910.79 & 0 days]

The location of the proposed fire hydrants are being optimized and the potable water system is being looped to improve potable water quality in the distribution system. The contractor's PCO was for \$256,290.79 & 294 days which included \$71,946.23 for additional bonds, primarily due to the extra time.

PCO#46 – Coatings [Increase of \$31,721.31]

The cost for the coatings escalated due to pandemic-induced inflation, to mitigate a larger change order, a modified coatings plan was developed.

PCO#47 – Hollowcore Support Angles [Increase of \$18,628.59]

Additional support of the hollowcore roof material was required along the masonry walls. This requires the installation of L brackets with adhesive anchors.

PCO#48 – Sleeves Coupling for Piping Under 3MG Tank [Increase of \$26,978.19]

The connection method to the 3MG tank was modified to mitigate risk due to future settling.

PCO#49 – MCB-1B [Increase of \$170,430 and 704 days]

Due to pandemic-induced supply chain issues, the critical main control breaker delivery has been delayed, resulting in 704 total days of delay. The following modifications to the Contractor's PCOs have recommended to account for concurrent delays:

- #38 – Remove 155 days
- #38 – Remove approximately \$36,080 in additional bonds
- #40 – Remove 2 days
- #40 – Remove approximately \$910 in additional bonds
- #42 – Remove 287 days
- #42 – Remove approximately \$69,110 in additional bonds
- #43 – Remove 255 days
- #43 – Remove approximately \$59,910 in additional bonds
- #44 – Remove 294 days
- #44 – Remove approximately \$69,380 in additional bonds

PCO#50 – Addition of Fiber Optic Cable and Accessories [Increase of \$30,973.68]

An additional run of fiber optic cable is required to connect from the pull box located at the new plant back to the existing system at the water plant. The ethernet switch was removed from the attached proposal, reducing the material costs to \$8,530.00.

PO Number:	390-04	Prepared by:	Sam Sadek
Company:	RJ Sullivan Corporation	Title:	Sr. Project Engineer
Contact:	Mickey Bartlett	Email:	s.sadek@pulsco.com
Project Name:	Palm Bay South Regional WRF	Phone:	949-261-1717

SUMMARY

\$8,745 - \$7,380 (Included in PCO #39) = \$1,365

PULSCO's original Scope of Supply included a 2,600 Gallon 72" OD vertical tank, per initial Contract Drawings and Specifications. PULSCO also included either a magnetic level gauge or a bladder monitoring device. Per Submittal R2 comments from Wade Trim, received 09MAR22 and RFI #035 Response, received 30MAR22, it was determined that the tank size and MAWP must increase. Wade Trim updated their operating requirements to provide 1,000 gallons of usable volume between 85 and 110 PSIG. This response also requested the inclusion of both a magnetic level gauge and bladder monitoring device. Also, in August 2022, RJ Sullivan requested the addition of two (2) E+H pressure transducers

DESCRIPTION OF CHANGES

ITEM 1	Reference Drawing:	735-50015-1	Cost Adder – To be added to Purchase Order
	Original:	Per Scope of Supply, PULSCO included a Bladder Monitoring Device <u>or</u> a Magnetic Level Gauge.	\$8,745
	Proposed:	Upon approval of this Change Order Request, PULSCO will provide a Bladder Monitoring Device <u>and</u> an Orion Magnetic Level Gauge. 2x E+H Cerabar PMC21 transducers	
	Reason:	Wade Trim recommends the inclusion of both a BMD and Magnetic Level Gauge. Also, request for 2x transducers.	

ITEM 2	Reference Drawing:	735-50015-2	Cost Adder – To be added to Purchase Order
	Original:	Vertical 72" OD, 2,600 Gallon Tank with 90 PSIG MAWP	\$45,602
	Proposed:	Vertical 108" OD, 6,100 Gallon Tank with 150 PSIG MAWP	
	Reason:	New operating parameters to provide 1,000 gallons of usable volume between 85 and 110 PSIG.	

NOTES

Reference drawing will be updated and submitted for approval after Change Order is received.
Item 1 includes revised Seismic/ Wind Calculations for the updated tank design.
Quote Validity: 15 Days. Terms and Conditions – Per Contract

SCHEDULE / LEAD TIME

Included in PCO #39

Revised Submittal will be available within 4 weeks of approved change order.
Tank fabrication time is estimated at 22 weeks from receipt of approved Submittal, with no comments.
It is advised to provide approval to release long lead steel items (tank heads and shell) as soon as possible in order to reduce risk of delays.
These lead times are estimated. Lead times may vary depending on material availability at time of order.

This \$12,630.00 cost for Kubota would be part of the owner direct purchase order and should be paid directly to Kubota.

Title: ***Request for Information 05***

Dear Mr. Bartlett,

Per your request to change the Plant Reuse Pump condition to 380 GPM @ 91.2 psi and 100 GPM @ 110 psi, Kubota proposed *Sulzer USA.4648-XPD.23.0032-F0* to meet these requirements. The price increase for this change is **\$7,920.00**. Pumps datasheets are attached below.

In order to replace the submersible level sensor in Chlorine Contact Tank and Ground Storage Tank with ultrasonic level sensors (HydroRanger 200 Ultrasonic level controller), there is a **\$4,710.00** price increase. According to Engineer approval (Comment #10 on P&ID Revision 1 or SDR 11500-04.1 Response #2), level sensors in the Sludge Storage Basins will be submersible.

Best regards,

Mahdi Heidarizad
Project Engineer

Engineers review is for general conformance with the design concept and contract documents. Markings or comments should not be construed as relieving the contractor from compliance with the project requirements, nor departures therefrom. The contractor remains responsible for details and accuracy, for confirming and correlating all quantities and dimensions, for selecting fabrication processes, for techniques of assembly, and for performing his work in a safe manner.

Clarification:

1. Kubota will supply ultrasonic level transmitter for Feed Forward Pump Station level sensor (LE-04011A1) per Addendum #6 issued August 25, 2020.
2. Per engineer clarification, Chlorine Contact Tank level sensor, LE-180201A, and Ground Storage Tank level sensor, LE-250101A, are changed to ultrasonic level transmitter. Therefore, the total quantity of ultrasonic level transmitter changed to five (5).

Level measurement

Continuous level measurement Controllers

HydroRanger 200 HMI

Overview

HydroRanger 200 HMI is an ultrasonic level controller for up to six pumps and provides control, differential control, and open channel flow monitoring.

Benefits

- Easy to use HMI display with local four-button programming, menu-driven parameters, and Wizard support for key applications
- English, German, French, Spanish, Chinese, Italian, Portuguese, and Russian texts on the HMI
- Removable terminal blocks for ease of wiring
- Monitors wet wells, weirs, and flumes
- Communication using built-in Modbus RTU via RS 485 and SIMATIC PDM configuration software
- Compatible with SmartLinx system: PROFIBUS DP, PROFINET (cyclic access of process values only), DeviceNet, Modbus TCP/IP, and EtherNet/IP
- Single or dual point level monitoring
- 6 relays
- Auto False-Echo Suppression for fixed obstruction avoidance
- Anti-grease ring/tide mark buildup
- Differential amplifier transceiver for common mode noise rejection and improved signal-to-noise ratio
- Wall and panel mounting options

Application

For water authorities, municipal water, and wastewater plants, HydroRanger 200 HMI is an economical, low-maintenance solution delivering control efficiency and productivity needed to meet today's exacting standards. It offers single point monitoring with all models, and optional dual-point monitoring with 6 relay model. As well, it has digital communications with built-in Modbus RTU via RS 485.

The standard 6 relay HydroRanger 200 HMI will monitor open channel flow and features advanced relay alarming and pump control functions as well as volume conversion. It is compatible with SIMATIC PDM, allowing for PC configuration and set-up. Sonic Intelligence advanced echo-processing software provides increased reading reliability.

HydroRanger 200 HMI uses proven continuous ultrasonic echo ranging technology to monitor water and wastewater of any consistency up to 15 m (50 ft) in depth. Achievable resolution is 0.1 % with accuracy to 0.25 % of range. Unlike contacting devices, HydroRanger 200 HMI is immune to problems caused by suspended solids, harsh corrosives, grease or silt in the effluent, reducing downtime.

- Key Applications: wet wells, flumes/weirs, bar screen control

Ultrasonic transducers

EchoMax XPS

Overview

EchoMax XPS transducers use ultrasonic technology to measure level in a wide range of liquids and solids.

Benefits

- Integral temperature compensation
- Low ringing effect reduces blanking distance
- Optional foam facing for dusty applications
- Self-cleaning and low-maintenance
- Chemically resistant
- Hermetically sealed

Application

XPS transducers can be fully immersed, are resistant to steam and corrosive chemicals, and can be installed without flanges.

The XPS series offers versions for various measuring ranges up to 30 m (100 ft) and up to a max. temperature of 95 °C (203 °F).

During operation, the EchoMax transducers emit acoustic pulses in a narrow beam. The level monitor measures the propagation time between pulse emission and its reflection (echo) to calculate the distance.

Direct connection

Coaxial connection

3 terminal direct*

3 terminal extension*

* For SITRANS LUT400, MultiRanger 100/200, HydroRanger 200

Mounting

Make particularly sure that the radiating face of the transducer is protected from damage. Mount the transducer so that it is above the maximum material level by at least the blanking value. On liquid applications, the transducer must be mounted so that the axis of transmission is perpendicular to the liquid surface. On solids applications, an Easy Aimer should be used to facilitate aiming the transducer. Consider the optional temperature sensor when mounting the transducer.

Interconnection

Do not route cable openly or near high voltage or current runs, contactors and SCR control drives. For optimum isolation against electrical noise, run cable separately in a grounded metal conduit. Seal all thread connections to prevent ingress of moisture.

XPS ultrasonic transducer connections

Change Order Request

Quote No.:	P5119V60 Q01	Date:	4/20/2022
PO Number:	390-04	Prepared by:	Iain Case
Company:	RJ Sullivan Corporation	Title:	Project Engineer
Contact:	Mickey Bartlett	Email:	i.case@pulsco.com
Project Name:	Palm Bay South Regional WRF	Phone:	949-261-1717

SUMMARY

Included in PCO #39

PULSCO's original Scope of Supply included a 2,600 Gallon 72" OD vertical tank, per initial Contract Drawings and Specifications. PULSCO also included either a magnetic level gauge or a bladder monitoring device. Per Submittal R2 comments from Wade Trim, received 09MAR22 and RFI #035 Response, received 30MAR22, it was determined that the tank size and MAWP must increase. Wade Trim updated their operating requirements to provide 1,000 gallons of usable volume between 85 and 110 PSIG. This response also requested the inclusion of both a magnetic level gauge and bladder monitoring device.

DESCRIPTION OF CHANGES

ITEM 1	Reference Drawing:	735-50015-1	Cost Adder – To be added to Purchase Order
	Original:	Per Scope of Supply, PULSCO included a Bladder Monitoring Device <u>or</u> a Magnetic Level Gauge.	\$7,380
	Proposed:	Upon approval of this Change Order Request, PULSCO will provide a Bladder Monitoring Device <u>and</u> an Orion Magnetic Level Gauge.	
	Reason:	Wade Trim recommends the inclusion of both a BMD and Magnetic Level Gauge.	
ITEM 2	Reference Drawing:	735-50015-2	Cost Adder – To be added to Purchase Order
	Original:	Vertical 72" OD, 2,600 Gallon Tank with 90 PSIG MAWP	\$45,602
	Proposed:	Vertical 108" OD, 6,100 Gallon Tank with 150 PSIG MAWP	
	Reason:	New operating parameters to provide 1,000 gallons of usable volume between 85 and 110 PSIG.	

NOTES

Reference drawing will be updated and submitted for approval after Change Order is received.
Item 1 includes revised Seismic/ Wind Calculations for the updated tank design.
Quote Validity: 15 Days
Terms and Conditions – Per Contract

SCHEDULE / LEAD TIME

Revised Submittal will be available within 4 weeks of approved change order.
Tank fabrication time is estimated at 22 weeks from receipt of approved Submittal, with no comments.
It is advised to provide approval to release long lead steel items (tank heads and shell) as soon as possible in order to reduce risk of delays.
These lead times are estimated. Lead times may vary depending on material availability at time of order.

Notes:

- All Ductile Iron MJ Fitting Quoted C153 (Compact)
- All Fitting and Valves Quoted Less Accessories
- All Buried Ductile Iron Pipe and MJ Fitting Quoted Bituminous Coated
- All Flange Pipe and Fitting Quoted Prime Coated
- All Ductile Iron Pipe and Fitting Quoted Cement or Protecto 401 Lined as noted above
- All Ductile Iron Fitting (MJ & Flange) Quoted Are Globally Sourced
- All Ductile Iron Run Pipe prices are good for 1 year from Bid Date. After the one year period there will be a price increase of 3% and additional 3% for every 6 month after that. This escalation is from the pipe manufacturer and they have stated that it is not negotiable.
- Due to the volatile raw market All C-900 PVC, C-905 PVC, HDPE, SDR 35, Sch 80 PVC, Sch 40 PVC, Stainless Steel, Copper & Brass Pipe, Fittings, Valves, etc will/may need to be re-quoted at the time of purchase. Pricing Subject to Availability.

Confidential

<u>QTY</u>	<u>SIZE</u>	<u>DESCRIPTION</u>	<u>WEIGHT</u> <u>EACH</u>	<u>UNIT \$</u>	<u>EXT \$</u>
------------	-------------	--------------------	------------------------------	----------------	---------------

*** PVC prices are good till October 9, 2020

9. McDade Waterworks, Inc. reserves the right to apply "Price in Effect" at time of delivery due to shortages and/or further tariff declarations by state or federal agencies. McDade Waterworks, Inc will not be responsible for industry price changes or shortages beyond our control as a result of changes to current tariff law.
10. Due to the volatility of the raw PVC material market this quotation is valid until _____, at which time the order must be placed or this quotation is automatically voided . Prices are firm if order is released by _____ for shipment completed by _____. Pricing and order acceptance is contingent upon the selected PVC manufacturer receiving collectively sufficient orders to meet minimum run requirements . All backorders will be shipped , "Price In Effect" at time of shipment, If for any reason pipe is delivered after the terms of this quotation .
11. All valve boxes quoted less extension stem unless noted otherwise.
12. Flange Accessories Set Prices are Firm for 14 Days from Bid Date, & Must Ship Within 28 Working Days from Bid Date.
14. Pipe Supports - Do not include engineering calculations (ie. wind, seismic, etc). We can recommend someone who can provide this information if requested.
15. Line drawings are not included. If needed add \$1,000.00 per sheet.
16. No Spare Parts for any components on take-off are included, unless noted otherwise.
17. Electric Actuators are quoted Open/Close service, Unless stated otherwise.
18. Valve warranty for project is (2) years from date of shipment. Extended warranty can be purchased for a additional 1% of the purchase price for each additional year warranty up to 3 year maximum from date of shipment.

**** DISCLAIMER:**

McDade Waterworks, Inc. reserves the right to increase prices and/or change escalation terms at any time based on the potential of continued cost volatility.

Confidentiality. Both McDade and Customer agree that the terms of this quotation, including the attached pricing are confidential and shall be held in strict confidence by both parties and may not be disclosed unless required by law. Customer agrees not to post or publicly display the terms or the pricing. Customer also agrees that any discussions or negotiations regarding the attached pricing or any changes thereto (including but not limited to future pricing offerings) are also confidential and are pursuant to this provision of confidentiality.

The above quotation is **our** interpretation of the plans and specifications and should be reviewed by **your** firm for accuracy. Prices do not include valve boxes, ext stems, wrenches, start-up services, etc. unless specifically noted in our quotation. Prices are based on full freight allowed truckload shipments to the project. Additional materials ordered will be furnished on a case by case basis.

Terms: Net 30 Days

FOB: S/P - FFA to Jobsite (Based on Terms Above)

Please call should you have any questions or need any additional pricing.

Sincerely,

Mike Worrell

CHANGE ORDER REQUEST

Date:	19 March 2024	From:	Justin Aboloff
To:	Mickey Bartlett	Title:	Senior Project Engineer
Company:	R.J. Sullivan Corp.	Email:	jaboloff@bioairsolutions.com
Email:	mbartlett@rjsullivancorp.com	Doc#:	COR-003 R1
cc:		Project:	P20123 – Palm Bay, FL
Subject:	COR-003 (R1) – Upstream Ductwork (Updated Pricing)		

Dear Mickey,

Below please find BioAir's (revised) firm lump-sum pricing for BioAir to supply the upstream FRP ductwork as drawing P-8. The quotation below is for Fire-Retardant Vinylester resin FRP duct spools, elbows, tees, reducers, transitions, flanges and damper valves highlighted in the latest revision of drawing P-8 (highlighted in yellow). BioAir requires approval of this change order COR-003 (R1) and receipt of a Purchase Order before any design or fabrication can commence. Once BioAir executes COR-003 (R1), BioAir will provide fabrication drawings for approval. Upon the release to fabricate the approved fabrication drawings, BioAir requires approximately **14 - 16 weeks** to manufacture and deliver the equipment to the job site.

Description	Total Price
LOT OF UPSTREAM DUCTWORK SPOOLS, ELBOWS, TEES, REDUCERS, TRANSITIONS, INLET GOOSENECKS, EXTERNAL CONNECTION FLANGES & DAMPER VALVES per drawing P-8; includes field wrap kit materials and shipping to the jobsite.	\$99,600.00

Below is a list of the quantity of dampers included as well as the number of field joints required (to be completed by the installer):

Duct Size	Damper QTY	Field Joint QTY
Ø24"	-	1
Ø20"	-	6
Ø14"	4	1
Ø8"	-	2
Ø6"	2	6
Ø4"	13	5

Please note that this change order does not include any flexible connections for the ductwork. Due to the fact that FRP ductwork can expand and contract depending on the ambient air temperature, BioAir recommends that Wade Trim include flexible joints during the installation of the ductwork. The most critical areas are for long straight runs and wherever the duct changes direction.

Final Remarks:

- Drawing P-8 does not currently show the latest layout of the BioAir odor control system – with the main item in question being the grease filter – it is completely absent from the drawing. BioAir will supply the two (2) connecting flanges for this component along with the COR-003 (R1) ductwork scope.
- All supplied flanges to be per NBS PS15-69 standard.
- Damper valves will be provided with flanged connections. This is not clearly shown in Drawing P-8.
- Air inlet duct + damper valve for Future Anaerobic Reactor 1A2 was not included in the clouded details for Drawing P-8, nor was it labeled. Wade Trim to advise if the supply of this ductwork gooseneck and damper valve are required.

Terms and Conditions:

- Payment: 20% of COR-003 (R1) shall be due upon receipt of a purchase order, 80% (net 30) shall be due upon delivery of the ductwork and accessories to the job site.
- No taxes are included in the Price above
- The above is only per the requested change; any additional requirements that are not included in the original scope of supply and this change order will not be supplied. All additional costs and engineering time will be at the owner's responsibility.
- Approval of COR-003 (R1) will be a revision to the contract Purchase Order subject to the terms included here.
- **Above pricing offered is valid for 90 days.**
- All other existing contract conditions (including project warranty) remain unchanged.

Exclusions:

- Field installation of FRP duct is outside of BioAir's scope of supply.
- Field balancing of dampers is outside of BioAir's scope of supply.
- Installation hardware and gaskets are not included in BioAir's scope of supply.
- Duct supports are not included in BioAir's scope of supply.
- Flexible joints/connectors are not included in BioAir's scope of supply.

Feel free to let me know should you have any questions.

Best Regards,
BioAir Solutions, LLC

Notes:

- All Ductile Iron MJ Fitting Quoted C153 (Compact)
- All Fitting and Valves Quoted Less Accessories
- All Buried Ductile Iron Pipe and MJ Fitting Quoted Bituminous Coated
- All Flange Pipe and Fitting Quoted Prime Coated
- All Ductile Iron Pipe and Fitting Quoted Cement or Protecto 401 Lined as noted above
- All Ductile Iron Fitting (MJ & Flange) Quoted Are Globally Sourced
- All Ductile Iron Run Pipe prices are good for 1 year from Bid Date. After the one year period there will be a price increase of 3% and additional 3% for every 6 month after that. This escalation is from the pipe manufacturer and they have stated that it is not negotiable.
- Due to the volatile raw market All C-900 PVC, C-905 PVC, HDPE, SDR 35, Sch 80 PVC, Sch 40 PVC, Stainless Steel, Copper & Brass Pipe, Fittings, Valves, etc will/may need to be re-quoted at the time of purchase. Pricing Subject to Availability.
*** PVC prices are good till October 9, 2020
- McDade Waterworks, Inc. reserves the right to apply "Price in Effect" at time of delivery due to shortages and/or further tariff declarations by state or federal agencies. McDade Waterworks, Inc will not be responsible for industry price changes or shortages beyond our control as a result of changes to current tariff law.
- Due to the volatility of the raw PVC material market this quotation is valid until _____, at which time the order must be placed or this quotation is automatically voided. Prices are firm if order is released by _____ for shipment completed by _____. Pricing and order acceptance is contingent upon the selected PVC manufacturer receiving collectively sufficient orders to meet minimum run requirements. All backorders will be shipped, "Price In Effect" at time of shipment, If for any reason pipe is delivered after the terms of this quotation.
- All valve boxes quoted less extension stem unless noted otherwise.
- Flange Accessories Set Prices are Firm for 14 Days from Bid Date, & Must Ship Within 28 Working Days from Bid Date.
- Pipe Supports - Do not include engineering calculations (ie. wind, seismic, etc). We can recommend someone who can provide this information if requested.
- Line drawings are not included. If needed add \$1,000.00 per sheet.
- No Spare Parts for any components on take-off are included, unless noted otherwise.
- Electric Actuators are quoted Open/Close service, Unless stated otherwise.
- Valve warranty for project is (2) years from date of shipment. Extended warranty can be purchased for an additional 1% of the purchase price for each additional year warranty up to 3 year maximum from date of shipment.

**** DISCLAIMER:**

McDade Waterworks, Inc. reserves the right to increase prices and/or change escalation terms at any time based on the potential of continued cost volatility.

Confidentiality. Both McDade and Customer agree that the terms of this quotation, including the attached pricing are confidential and shall be held in strict confidence by both parties and may not be disclosed unless required by law. Customer agrees not to post or publicly display the terms or the pricing. Customer also agrees that any discussions or negotiations regarding the attached pricing or any changes thereto (including but not limited to future pricing offerings) are also confidential and are pursuant to this provision of confidentiality.

The above quotation is our interpretation of the plans and specifications and should be reviewed by your firm for accuracy. Prices do not include valve boxes, ext stems, wrenches, start-up services, etc. unless specifically noted in our quotation. Prices are based on full freight allowed truckload shipments to the project.

RE: Palm Bay South Regional Water Reclamation Facility
Palm Bay, Florida
Wade Trim
Bid Section: 158985 – Fiberglass Ductwork

We appreciate this opportunity to provide the following proposal for the design, fabrication and delivery of the following FRP Ductwork

Specification exceptions and exclusions:

- 1.02-A Midwestern Fabricators is proposing as an equal
- 1.04 Site storage and handling is the responsibility of the contractor
- 2.02-K Pipe hangers and supports are not included
- 2.03-A Dampers will be manufactured by Midwestern Fabricators
- 3.01 Installation is not included
- 3.02 Site testing and balancing is the responsibility of the contractor

Scope of supply: (drawings: P-5 & P-8)

- All 3” dia. FRP ductwork from the Anaerobic Reactor 1B1 & 1B2 cover penetrations to the 14” reducer
- All 3”, 4”, 8” & 12” dia. FRP ductwork from the two (2) sludge storage basins, drum screen and grit removal cover penetrations to the 14” reducer
- All 14” dia. FRP ductwork from the reducer to the inlet of Blower
 - Accessories:
 - Plug:
 - 3” dia. = 1
 - Dampers:
 - Inline Control type:
 - 3” dia. = 8
 - 4” dia. = 1
 - 8” dia. = 4
 - Air Inlets per detail 3 dwg P-8:
 - 3” dia. = 5
 - 8” dia. = 2
 - Slip on Flexible connections:
 - 3” dia. = 1
 - 12” dia. = 1
 - 14” dia. = 1
 - Butt and Wrap Field Joints:

Proposal

Midwestern Fabricators, Inc.
1235 so Pioneer Road – Salt Lake City, UT 84104
801-708-7254 ext 104 – jeff@mwf-frp.com

Midwestern Fabricators

- 3" dia. = 7
- 4" dia. = 2
- 8" dia. = 3
- 12" dia. = 6
- 14" dia. = 2

(Note: we are manufacturing shop spool sections to minimize installation labor. The above noted butt and wrap joints are the total that is needed to be done by the installer)

Pricing for the above FRP Ductwork delivered to the jobsite in Palm Bay, FL is:

\$ 22,100.00

Typical Time Frames:

Submittal: 4 weeks ARO

Fabrication: 16 weeks ADA

Time frames are dependent on backlog at time of order and fabrication release

Payment Terms: 100% Net 30 days from shipment or notification of completion

Quote Validation: 45 days

Exclusions:

- Hangers
- Supports
- Fasteners
- Gaskets
- Site verification of dimensions
- Installation
- Manufacturer site services, testing, training and inspection
- Sales Tax

Midwestern Fabricators, Inc. Conditions of Sale

All proposals are based on, and all products are sold on the following terms, conditions and procedures.

THIS PROPOSAL PRICE - is firm if customer's order is placed within forty five (45) days from the date of the proposal. Pricing is quoted in U.S. dollars. Prices are subject to change and buyer agrees to pay any change to pricing due to deviation from items listed on this proposal, changes to submitted items, escalated pricing to raw materials, freight and tariffs.

Payment Terms - Buyer agrees to pay 100% of the purchase price within 30 days of invoiced date. Late fees will be added to invoice total if buyer fails to pay fully the invoice by the due date.

DELIVERY TIME – The time of delivery stated on the proposal face is Midwestern Fabricators, Inc. best estimate and is subject to change depending on current fabrication backlog at time of order and submittal acceptance/release for fabrication. While we strive to diligently meet the dates listed at the time of proposal, Midwestern Fabricators is not liable for any delay in shipment from any cause whatsoever and Purchaser agrees not to make any such claim.

ACCEPTANCE – Acceptance of this proposal whether by a separate purchase order or by other means shall constitute an acknowledgement of the quotation as written and an acceptance of the terms and conditions thereof. This Agreement is governed by and subject to the laws of the State of Utah.

SECURITY INTEREST – Until all amounts due hereunder have been paid in full, Midwestern Fabricators, Inc. has a security interest in said equipment and proceeds thereof and has all rights of a secured party under the Uniform Commercial Code including, without limitation, the right to take possession of said equipment without legal process and the right to require Buyer to assemble said equipment and make it available to Midwestern Fabricators, Inc. at a place reasonably convenient to both parties. At Midwestern Fabricators, Inc request, Buyer shall execute any financing statement or statements submitted by Midwestern Fabricators, Inc. in order that Midwestern Fabricators, Inc. security interest in said equipment may be perfected.

WARRANTY – Midwestern Fabricators, Inc. warrants only that said equipment is free from defects in materials and workmanship as set forth in Manufacturer's Certificate of Warranty furnished to Buyer at the time of final shipment. Midwestern Fabricators, Inc. makes no other warranty concerning said equipment beyond that set forth in said Certificate and expressly disclaims any warranty of merchantability or fitness for any particular purpose not described in the applicable drawings and specifications.

Midwestern Fabricators, Inc. sole responsibility with respect to any equipment which proves to be defective as to materials or workmanship is either to replace or to repair the same as is set forth in said Certificate of Warranty. Unless authorized in writing by Midwestern Fabricators, Inc., Midwestern Fabricators, Inc. is not responsible for any charge or expense incurred for the modification, servicing or adjusting of said equipment after the same has been delivered to Buyer.

Proposal

Midwestern Fabricators, Inc.

1235 so Pioneer Road – Salt Lake City, UT 84104

801-708-7254 ext 104 – jeff@mwf-frp.com

LIABILITY OF SELLER – Midwestern Fabricators, Inc. is not liable in any event hereunder for any consequential, incidental or liquidated damages or penalties.

CANCELLATION – Should Buyer cancel this agreement without Midwestern Fabricators, Inc. prior written consent, Midwestern Fabricators, Inc. may, at its option, recover from Buyer a cancellation charge of not less than 20% of the purchase price hereunder, as well as an additional costs associated with drawings, engineering work, raw material purchases, etc.

STORAGE – If at such time, within or after the estimated shipment period specified on the face hereof, Midwestern Fabricators, Inc. notifies Buyer that said equipment is ready to be shipped Buyer requests a delay in shipment. Midwestern Fabricators, Inc. may, at its option, agree to store said equipment for a period of time determined by Midwestern Fabricators, Inc., provided that such agreement will not affect Buyer's obligation to pay in full all invoices as they become due, and provided further that for each month, or portion thereof, said equipment is so stored by Midwestern Fabricators, Inc., Buyer shall pay to Midwestern Fabricators, Inc. as a storage fee an amount equal to 1% of the balance due hereunder.

DRAWINGS, ILLUSTRATIONS AND MANUALS – Catalog and proposal drawings, bulletins, and other accompanying literature are solely for purpose of general style, arrangement and approximate dimensions. Unless otherwise stated on our proposal, buyer is responsible to verify and approve submitted dimensions.

Submittal for approval, if required, will be made after receipt of complete information from Buyer. Installation, maintenance and operation manuals will be furnished in the number of copies specified.

PERMITS, LICENSES – Buyer at its sole cost and expense shall obtain all building or other permits or licenses with respect to the installation and operation of said equipment required by a federal, state or local governmental body.

Taxes – Unless otherwise stated in the proposal Midwestern Fabricators, Inc. is not including sales tax and buyer is responsible for all taxes. Tax exemption certificates, if applicable, are to be provided by the Buyer to Midwestern Fabricators, Inc. for record keeping.

By signing this document, the Buyer agrees to all above Terms and Conditions and to purchase the items listed in the scope of supply.

RE: Quotation for Bore & Jack

PROJECT: Palm Bay South Regional Water Reclamation Facility

LOCATION: Palm Bay, FL.

Dear Sir:

Based on the information provided by your firm Central Florida Underground, Inc. proposes the following :

Furnish and install 30" .375 coated OD casing by bore and jack utilizing a steering system to maintain proper elevation of casing in bore pits dewatered and excavated by others.

2- Locations Approximately	116 L.F @	445.00	\$51,620.00
TOTAL AMOUNT PROPOSED			\$51,620.00
Add if Bond Required			\$1,150.00

Notes:

- a. All permits to be by others - including any inspection fees
- b. Final payment is based on the actual quantity installed
- c. All utilities to be located and verified by others
- d. All boring equipment and casing to be placed in pits by others
- e. All M.O.T required to be provided by others, including any barrier wall if required
- f. Carrier pipe and installation to be by others

Bryan Ward
President

Re: Palm Bay SRWRF
Purchase Order No. 390-02 – Grit Removal System

Dear Mr. Bartlett,

Hydro International (Hydro) bid the above reference project in September 2020 and received your purchase order in December 2020. Our pricing was based on a projected shipment timing of July 2021 which is outlined in our bid scope (attached). Since receiving your purchase order, Hydro has worked with you via Cameron Young of Moss Kelly, Inc., and Wade Trim to review the grit system design criteria. We provided a price reduction to remove the grit pumps and associated controls from our scope of supply in June 2021 (\$40,934). At this time, we have not received a change order confirming the scope change.

Despite not having a formal change order, Hydro issued a revised submittal in February 2022 and received Wade Trim's response to our re-submittal dated April 11, 2022. One of the comments made by Wade Trim states that the peak flow rate has been changed from 9 MGD to 7.5 MGD. This change results in a reduction in the number of trays required in the HeadCell[®] unit from eight trays to six trays. Typically, this change would lead to a deduct but unfortunately, our costs for the entire system have significantly increased since December 2020.

Following a conference call with Wade Trim, Hydro issued a revised submittal package on May 9, 2022. We received final approval and release to fabrication on July 8, 2022. We have now reconciled all the impacts of the revised scope and current market conditions. While the number of trays in the HeadCell has been reduced, the final design includes extending the influent duct height to allow for a raised influent channel invert. This change increases the quantity of stainless steel which increases our cost to manufacture. Below is a summary of the contract costs:

\$401,450	Original Contract (12/17/2020)	} PCO #027
<u>\$40,934</u>	Credit for Gravity Flow (6/1/2021)	
\$360,516	Revised Scope/Price	
\$76,145	Scope Changes/Cost increase to 2022 delivery	← PCO #041
<u>\$4,569</u>	6% State Sales Tax	
\$80,714	Total Increase (not including county tax) – Change Order Value	
\$360,516	Revised Scope/Price	
<u>\$80,714</u>	Change Order Value	
\$441,230	New Contract Value – not including county tax	

Based on the current scope and market conditions, Hydro is formally requesting a change order to address the removal of the grit pumps and controls, cover cost increases due to scope changes as well as the delayed release to fabrication. We appreciate your consideration in this matter and look forward to your feedback.

Sincerely,

Pat Herrick
Sales Director – Americas Wastewater

Split Loads (within 1 mile max)	75.00	each
Waiting Time	1.50	per Minute

We propose to furnish the above stated mix designs that will meet the stated strength when test specimens are manufactured and tested in accordance with current ASTM standards and evaluated per ACI recommended standards and practices. Maschmeyer Concrete requests copies of all approved Mix Designs prior to job site deliver. In order to comply with ACI 318-99 Paragraph 5.3, we request that Maschmeyer Concrete be included on the distribution list for all Concrete Test Reports. It is recommended that a pre-pour conference be held at the jobsite prior to site delivery. The purpose of the meeting would be to answer any questions regarding responsibilities in scheduling and jobsite operations. All Pearock Pump mixes and Grout mixes are not designed to be used as a Masonry Grout or for use in any type of slab or similar structure which may be subject to drying shrinkage limits.

Escalation - Fab and Fittings

If signed purchase order agreement is acceptable to both parties within 30 days of quotation, Ductile Iron Pipe, Fitting and Fabrication prices will be held firm thru 09-30-2023.

BID ITEM	QTY	SIZE	DESCRIPTION	WEIGHT EACH	UNIT \$	EXT \$
----------	-----	------	-------------	----------------	---------	--------

- From 10-01-2023 - 03-31-2024 a 5% unit price increase will be in effect for all releases to jobsite.
From 04-01-2024 - 09-30-2024 a 5% additional unit price increase will be in effect for all releases to jobsite.
All releases to jobsite after 10-01-2024 will be based on new quoted prices at that time.
- 8 At this time US Pipe and American are not producing fittings 24" and smaller.
Fittings are only made by Fitting Manufactures and brands are blended when we ship projects based on availability at time of order.
- 9 Due to the volatile raw market All C-900 PVC, C-905 PVC, HDPE, SDR 35, Sch 80 PVC, Sch 40 PVC, Stainless Steel, Copper & Brass Pipe, Fittings, Valves, etc. will/may need to be re-quoted at the time of purchase. Pricing Subject to Availability.
*** PVC prices are good till 05-02-2023.
- McDade Waterworks, Inc. reserves the right to apply "Price in Effect" at time of delivery due to shortages and/or further "Force Majeure" declarations by manufacturer(s). McDade Waterworks, Inc will not be responsible for industry price changes or shortages beyond our control.
- 11 All valve boxes quoted less extension stem unless noted otherwise.
- 12 Flange Accessories Set Prices are Firm for 14 Days from Bid Date, & Must Ship Within 28 Working Days from Bid Date.
- 13 Pipe Supports - Do not include engineering calculations (ie. wind, seismic, etc.). We can recommend someone who can provide this information if requested.
- 14 Line drawings are not included. If needed add \$1,000.00 per sheet.
- 15 No Spare Parts for any components on take-off are included, unless noted otherwise.
- 16 Kennedy Valve warranty for project is (1) year from date of shipment. Extended warranty can be purchased for a additional 1% of the purchase price for each additional year warranty up to 3 year maximum from date of shipment.

**** DISCLAIMER:**

McDade Waterworks, Inc. reserves the right to increase prices and/or change escalation terms at any time based on the potential of continued cost volatility.

Confidentiality. Both McDade and Customer agree that the terms of this quotation, including the attached pricing are confidential and shall be held in strict confidence by both parties and may not be disclosed unless required by law. Customer agrees not to post or publicly display the terms or the pricing. Customer also agrees that any discussions or negotiations regarding the attached pricing or any changes thereto (including but not limited to future pricing offerings) are also confidential and are pursuant to this provision of confidentiality.

The above quotation is **our** interpretation of the plans and specifications and should be reviewed by **your** firm for accuracy. Prices do not include valve boxes, ext. stems, wrenches, start-up services, etc. unless specifically noted in our quotation. Prices are based on full freight allowed truckload shipments to the project. Additional materials ordered will be furnished on a case by case basis.

Terms: Net 30 Days
FOB: S/P - FFA to Jobsite (Based on Terms Above)

Please call should you have any questions or need any additional pricing.

Sincerely,

Christian Fracchia

Subject: Angle Brackets for R.J. Sullivan

Good Morning Garrett,

Can you get 4 x 4 x 5/16 316SS angle that is "Made in America"? If so, I need a price for 11 of the attached angle brackets.

Thanks,

Mickey Bartlett

To: Mickey Bartlett <mbartlett@rjsullivancorp.com>

Cc: "Supica, Damone" <damone.supica@kubota.com>

Mickey,

The change order pricing for the items below is \$10,415:

- Cisco IE-2000-4TS-G-B, IE2000 Ethernet Switch, 4 CU, 2 SFP
- Includes fiber optic cable and terminations, two (2) termination boxes, two (2) SFP modules, one (1) Ethernet Switch
- Does not include installation (by contractor/electrician) or an Ethernet Switch at the existing control room

Let me know if you have any questions.

Thank you!

Mickey,

The price for just the fiber optic cable and terminations, termination boxes, and SFP modules is \$8,530 (no switch). As I mentioned, we can use the existing Ethernet switch in our control panel if that's the route the owner prefers.

Not yet. Any way you can break out the cost of the switch so I can submit it before they choose?

Thanks,

Mickey Bartlett

Hi Mickey,

Did you hear back as to whether the board reviewed and/or approved the change order?

Mickey,

Great, thank you.

Please keep me posted.
