

LEGISLATIVE MEMORANDUM

TO: Honorable Mayor and Members of the City Council

FROM: Suzanne Sherman, City Manager

THRU: Valentino Perez, Public Works Director

DATE: October 3, 2024

RE: Consideration of utilizing Stormwater Utility Funds for the Florin Pond drainage rejuvenation (Project 25SU02 - \$600,000).

SUMMARY:

The Public Works Department has identified the need to rejuvenate/upgrade Florin Pond located at 1198 Jordon Court NE adjacent to Palm Bay Estates. The project will consist of redesigning Florin Pond to be deeper and install an NSBB (Nutrient Separating Baffle Box) in the outfall section of the pond to assist with removing total nitrates, phosphorus, and suspended solids. This project will also consist of adding a solar power aerator with pond stone and a six-foot fence around the solar aerator to protect it. Stormwater Funding will be used to design the project. Although our initial departmental estimate is for design and construction, we will have a better understanding of the costs required for construction once the design is complete.

REQUESTING DEPARTMENTS:

Public Works

FISCAL IMPACT:

Funding is available in Stormwater Utility Undesignated Fund Balance. Upon Council approval, funds in the amount of \$600,000 will be transferred from Stormwater Utility Undesignated Fund Balance 461-0000-392.30-06 to 461-7084-541-4648/25SU02. This will provide a budget to include design, construction, advertisement, and other incidentals necessary to complete the project.

STAFF RECOMMENDATION:

Motion to approve and authorize use of using Stormwater Utility Funds to open and assign funding to project 25SU02 Florin Pond Drainage Rejuvenation

Honorable Mayor and Members of the City Council
